

**A STORY LINE TOWARDS
A CONSERVATION ATLAS FOR TRANSBOUNDARY AREAS
OF THE WORLD**

HYPOTHESIS

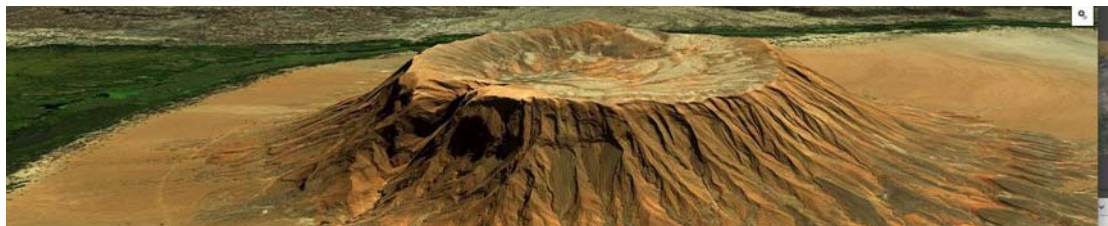

Is it possible to develop a Global Atlas with with selected data that would allow for focussing on identified conservation areas in the WDPAs as functional internet conservation planning tool during the initial phases of TBCA development

INTRODUCTION

Volcanic lake in Cameroon surrounded by remnant highland forest

1 - REVIEW THE BASIS FOR TRANSBOUNDARY CONSERVATION
Conservation manages the basic Ecosystem service for human benefit

Small volcanic inselberg in Ethiopia

2 - UNDERSTAND THE KNOWLEDGE BASE FOR TBCAS
The data selection - Understanding, Management, Zoning concepts

The basalt escarpment of the Drakensberg
